

Your VID service will end no later than July 1, 2028

Dear [Registrant],

User ID

Domain

Your VID service will cease no later than 1 July 2028, and Punktum dk will no longer handle this service for you

The discontinuation of VID service is primarily due to a need to offer a newer and more secure solution.

In 2025, we announced that Punktum dk is changing the model for administration of .dk domain names, where from mid-2028 all commercial customer relationships will be handled exclusively by registrars of .dk domain names. As the VID service in its current form cannot be offered by registrars, the time has therefore come for an update.

The VID service will be replaced by a modern and more secure product called Registry Lock, which registrars of .dk domain names will be able to offer to their registrants in the future.

What does this mean for you?

For now, it does not matter, and your .dk domain name(s) can continue with the existing VID service until the time when it will be possible for a registrar to offer Registry Lock.

Right now, your domain name(s) with VID service are handled by us. If you want to switch to registrar management, which must be done before 1 July 2028, you must be aware that your VID service will then be discontinued.

Of course, you can also choose to terminate the VID service agreement with us immediately, but our recommendation is that you continue. If you wish to terminate your VID service, this must be done via our self-service solution. [You can find the instructions here](#). Upon termination of the VID agreement, you will be credited for all prepaid fees, minus a termination fee.

Best regards

Punktum dk
